

Over 8 years of extensive experience building user-first and data-driven solutions, leading from within operations and product teams. My expertise has evolved through innovative & broadscaling SaaS startup companies during their hyper-growth & strategy defining moments. I'm a dedicated learner & self-starter surely quick to ramp up & drive impact.

## Experience

### General Assembly | Manhattan, NY

*Product Operations Manager*

*June 2022 - July 2023*

- Automated Jira ticket actions and assisted with project board setups to support Product and Technical Project Manager's workflows, increasing sprint efficiency.
- Refined and triaged service desk & stakeholder tickets across the Product department, designed custom metrics and dashboards to provide ticket volume trends and insight reports to serve as strong strategic planning artifacts
- Updated the Software Development Capital Expense policy & work tracking practices, resulting in more accurate captures of resource allocation and an immediate EBITA increase
- Managed information radiators for the Product department to ensure stakeholder alignment and effectively communicated product roadmap updates among relevant business partners

### DailyPay | Manhattan, NY

*Senior Partner Support Analyst*

*September 2020 - May 2022*

*Partner Support Analyst*

*May 2019 - September 2020*

- Provided implementation and technical support for enterprise clients  
Created dashboards to monitor and reduce revenue impacting outages, documented technical specifications & resources for troubleshooting
- Improved support case resolution efficiency & CSAT scores by developing team product trainings, case escalation paths, technical troubleshooting documentation, and product knowledge base articles
- Collaborated with leadership to define SLA and KPI metrics for Partner & Customer Support teams
- Streamlined product feedback integration and sourced enterprise clients for new feature testing, partnering with Product and implementation teams to refine product offerings & enhance user experience

### The Pintern | Central Islip, NY

*Founder & E-commerce Operations Manager*

*May 2019 - Present*

- Design and sell enamel pins through e-commerce platforms and partnerships with student and community driven organizations
- Responsible for product and packaging design, manufacturer collaboration, order processing, marketing, and managing e-commerce storefronts through Shopify and Etsy Marketplace platforms
- Leverage data analytics, SEO, market trends data, and targeted ads to drive organic traffic and conversion rate

### Lyft | Queens, NY

*Senior Driver Operations Associate*

*September 2018 - May 2019*

*Driver Operations Associate*

*December 2016 - September 2018*

- Delivered operational and technical support for the driver app and back-end platform
- Led pilot programs to reduce wait & resolution times for in-person driver support, improved associates' CSAT and NPS scores tied to onboarding and product support
- Supported product launches and operational initiatives including Lyft's Car Rentals, rollout of the Amp Light hardware, development of the nation-wide rider's lost & found database, and NY State market expansion
- Synthesized Product feedback to inform Lyft's driver app enhancements, collaborated with UX Researchers and Product Designers on survey distribution, focus group facilitation, driver outreach programs, and workflow design for product feedback collection and synthesizing

## **Yaleet, Inc. | Melville, NY**

*Operations Associate*

*October 2015 - December 2016*
